CABLE·RAIL®

Make your railing view friendly with the original stainless steel cable infill system

Slender CableRail cable assemblies are the perfect railing infill alternative to pickets and glass panels. All CableRail cables and fittings are made from 316-grade stainless steel for weather-tough durability, ultra-low maintenance, and lasting beauty.

SOLUTION

A

CableRail Kits

CableRail Kits are the most popular and cost-effective solution for wood and metal railing frames and include everything needed to attach and tension a cable. They come in standardized lengths that can be trimmed in the field and have special end fittings that are sleek, simple to use, and easy to conceal. CableRail kits are designed for frames where there is access to drill through both end posts, allowing the fittings to anchor to the outer faces of the posts.

SOLUTION

B

Build Your Own

You can also create assemblies to fit your needs using CableRail Quick-Connect® fittings. These fittings feature special one-way jaws that automatically grab and lock-on after the cable is inserted, making field assembly and installation fast and easy. This is a great option if your railing condition requires attaching one or both cable ends to a wall or inside face of a post, or if using composite-sleeved wood posts.

SOLUTION

C

Custom Solutions

Feeney also offers a wide assortment of cables, turnbuckles, terminals, adjusters, and fixed ends, in both machine-swage and hand-swage styles, for making custom assemblies to fulfill specific design and function needs. You can order individual components and build your own or let us fabricate them for you, complete and ready to install.

Accessories & Tools

Find all the items you'll need to create and detail the perfect railing solution. Our CableRail accessories include protector sleeves, stainless steel beveled washers, intermediate pickets, and a variety of decorative end caps for covering and protecting the ends of cable runs. Feeney also offers a variety of tools to help you install and maintain a beautiful railing.

DesignRail®

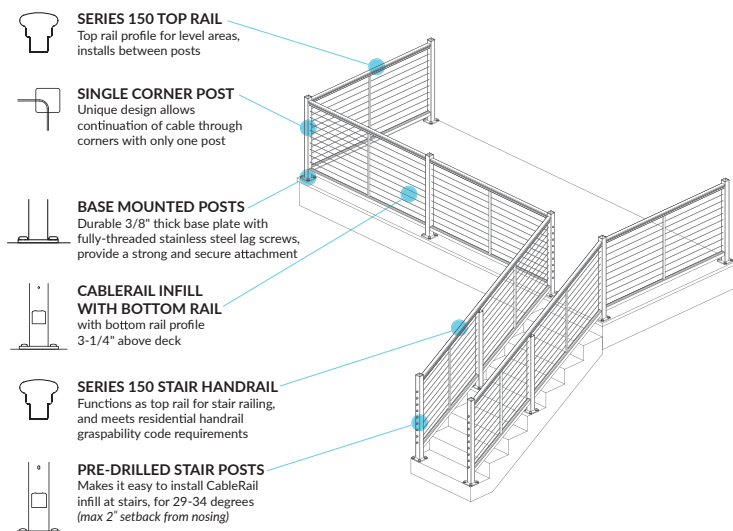

Aluminum Railing Systems

DesignRail® railings combine the durability and low maintenance of powder-coated aluminum with innovative design details to ensure lasting beauty, structural integrity, and affordability. The component-based systems are pre-engineered, simple to design, easy to install, and adaptable to any exterior, interior, residential or commercial project.

Architectural Rods

Feeney Architectural Rod assemblies are an attractive, high-strength, low-maintenance alternative to traditional steel rod and wire rope rigging systems, that have the added benefit of being able to support loads in both tension and compression conditions. All assemblies are made to order, ready to install and can be used in a variety of structural and decorative applications from glass curtain wall and door canopy supports, to guardrail balusters, and trellis infill grids.

Trellises

Our trellises are sold in complete, easy-to-use kits with powder-coated aluminum support frames and sleek stainless steel cable and rod vine grids. Utilitarian, decorative, and artistic, these trellises are perfect for displaying light- to medium-weight foliage in both residential and commercial settings. They offer simple, elegant design details with exceptional versatility and easy installation. Use them to minimize UV exposure on walls, control ambient heat gain, frame a lovely view, direct foot traffic, or create a cool, relaxing retreat.
