

# What makes ROCKWOOL the premium insulation?

#### **Fire Resistance:**

ROCKWOOL stone wool insulation will not burn or produce smoke and can withstand temperatures up to 2150°F (1177°C). ROCKWOOL can protect your family by delaying the spread of flames.

## Water Repellent:

ROCKWOOL stone wool insulation also repels water so its R-value is not comprised by moisture or water. It also contributes to a healthy indoor environment because of its resistance to rot, mildew, mold and bacterial growth.

#### **Thermal Resistance:**

ROCKWOOL insulation products make living conditions more healthy and comfortable. Thermal resistance can dramatically reduce heating, cooling, and ventilation costs, and reduce your home's carbon footprint.

## **Sound Absorbent**

ROCKWOOL stone wool helps absorb sound and reduces sound transmissions. This enables productivity in the workplace, and keeps your home quiet and comfortable.

## **Comfortbatt**

Semi-rigid thermal batt insulation designed for exterior studs

## Safe'n'Sound

Premium acoustic insulation for interior walls and ceilings between floors

## **Comfortboard 80**

Exterior and Interior non-structural insulated sheathing boards used as continuous insulation

## **Comfortbatt**°
